

TRIX CIRCUS PRODUCT INFORMATION SHEET CERTIFIED AERIAL HOOPS

	Hollow all sizes	Solid 85cm	Solid 90cm	Solid 95cm
MBS (Certified)	1200 _{kg}	2,000 _{kg}	1760 _{kg}	1,600 _{kg}
Dynamic WLL				
User Load Limit	120 _{kg}	200 _{kg}	175 _{kg}	160 _{kg}

**2024 NATA
Destruction
Test Results**

**Solid: 12,640kg
(without rupture)**

**Hollow: 2491kg
(ruptured)**

*User loads must take into account dynamic forces applied.

- These aerial hoops are RPEQ engineered and certified for the above loads by Point Engineering/Jade Engineering. Please follow the guidelines above for all aerial hoops.
- All welds are completed in accordance with AS/NZS 1554.6.
- Material properties are formulated according to EN1993-1-4 Annex C.
- The above ratings do not take into account the effect of work hardening from fabrication (EN1993-1-4 Annex B).
- **Trix Circus** is not responsible for any direct, indirect or accidental consequences, injuries, damages or deaths resulting from the use of our products and equipment.

Trix Circus is an established company - operating in Australia for over 20 years with a proven track record. Our products are made to the most stringent safety standards. Trix Circus is recognised internationally for its commitment to safety.

Intended Use:

Aerial hoops can be dangerous if used recklessly or without experience. It is important that you never train alone.

- Always take care when using your hoop. Hard contact to the head may cause serious injury. Ensure that everyone present remains aware of the aerial hazards.
- Always place a certified protective crash mat underneath you.
- Always work with a professional coach and professional rigger to ensure ongoing safety.
- Never use under the influence of alcohol or narcotics.
- We recommend solid hoops for slack drops, dynamics and duo work. When choosing a hollow hoop, the ULL and MBS must be considered in association with the intended use.

Rigging:

Aerial equipment is dangerous when rigged incorrectly.

- The weld should be positioned at the 11 o'clock position (consider the rigging point is at 12 o'clock).
- A suitable anchor/structure must be installed to use the equipment. This can only be assessed by a qualified rigger and/or a certified engineer.
- Do not rig within 1.5m to any stationary object, including walls and poles.
- Minors should never be responsible for rigging any apparatus and should only use Trix Circus equipment under adult supervision.

Compatibility:

Aerial hoops can be dangerous if incorrectly used in association with other materials.

- Make sure your equipment is compatible with all other components of your system. Incompatible connections may result in equipment failure, injury or death.

Maintenance and Storage:

It is important to protect your hoop from dirt and weather damage that may cause the bar and/or tape to become slippery.

- Cover your aerial hoop with a protective casing (eg. flexible tubing, towels, padded wrapping) or a bag when travelling.
- Keep your aerial hoop indoors between use and away from any floors that are likely to become wet. The integrity of the steel will not deteriorate when in contact with water, however any grip tape will need to be replaced after exposure to water.
- Always ensure your apparatus is treated with care when rigging and de-rigging. Do not to drop your equipment during rigging.
- The use of resin, chalk and other adhesive grip technologies is recommended. Change your tape regularly to avoid a build up of materials which are a potential slip hazard.
- When re-taping your aerial hoop, clean off glue residue with shellite before retaping.
- You may tape over the weld. The weld should be positioned at the 11 o'clock position (consider the rigging point is at 12 o'clock).
- **Inspect your welds every 12 months** (at a minimum). You must remove the tape to do this inspection.
- You may conduct an annual Dye Penetration Test on the welds to ensure their integrity. Visit SmartChem (www.smartchemind.com.au/browse/sort/name/display/gallery/master-cat/dye-penetrant) for these products or for professional assistance.

Documentation:

Model:	
Serial Number:	TRIX-ECL-
Date of First Use:	
User/Owner:	

Made in Australia using foreign and domestic materials.

- Aerial and circus arts are inherently dangerous. There is a risk of injury or death that cannot be eliminated.
- This user guide does not tell you everything you need to know. Consult with a qualified rigger.
- Use of Trix Circus equipment is only permitted if you understand and assume all risks and responsibilities for any damage, injury or death that may result.
- Everyone using this equipment must be given this guide and thoroughly understand the information included in it.
- You must have a rescue plan in place and the means to implement it.
- Do not use around electrical hazards, moving machinery, near sharp edges or abrasive surfaces.

Inspection:

Inspect before and after every use.

- On receipt of your hoop, photographically record the tab holes and welds to make recognising any changes easier.
- Perform regular visual checks on the welds to observe for any changes **every 12 months** (at a minimum).
- You may conduct an annual Dye Penetration Test on the welds to ensure their integrity. Visit SmartChem for these products.
- On your certification, Trix Circus will provide you with "A" and "B" measurements. These are factory measurements of the internal dimensions of your hoop. You must take periodic measurements to compare to the factory-made measurements. Discontinue use of the hoop if "A" or "B" differ by more than 5mm from the factory measurement.
- If the hoop fails any of the above inspections immediately cease use and dispose of thoughtfully.

Lifetime:

Unlimited depending on wear and tear.

This will vary on use and storage conditions. Single use lifetimes are possible in extreme circumstances.

Retirement:

Retire from service and destroy if the hoop:

- is suspected of having been overloaded.
- shows 10% or more physical wear (eg. on the tab connection) upon inspection.
- If the hoop fails the Dye Penetration Test.
- If the original Interior Dimension measurements have changed by more than 5mm.
- has been misused, altered, damaged, exposed to harmful chemicals, etc.

Retire if you have any doubt about its safety.

Repairs or Modifications to Equipment:

Repairs or modifications are not permitted.

Principal Materials: Stainless Steel 304

CAUTION: USE AT OWN RISK
AERIAL CIRCUS IS INHERENTLY DANGEROUS
